

1) 1. "What is the hiring process at TCS for B.Tech freshers in 2025-2026? Number of rounds, types, and what each tests."

A) For B.Tech freshers in 2025–2026, TCS typically follows a **4-round process**: one online test (TCS NQT-based) and three interview rounds. The exact pattern can vary slightly for **Ninja**, **Digital**, and **Prime** tracks, but the skeleton below is standard for 2025–2026.[geeksforgeeks+4](#)

1. Online round (TCS NQT / Foundation + Advanced)

This is usually called **TCS NQT** or **Foundation + Advanced written test**, and it's the first elimination round.[clearround+2](#)

- **Format**: Online, time-bound (around **180–190 minutes**), generally adaptive.[prepinsta+1](#)
- **Sections**:
 - **Foundation (mandatory for all)**:
 - Numerical ability (quant aptitude).[geeksforgeeks+1](#)
 - Verbal ability (English, comprehension, grammar).[prepinsta+1](#)
 - Reasoning / logical ability (puzzles, sequences, etc.).[geeksforgeeks+1](#)
 - **Advanced (mandatory for Digital / Prime)**:
 - Advanced aptitude + reasoning.[prepinsta](#)
 - Advanced coding (1–2 programming questions, usually in C/C++/Java/Python).[geeksforgeeks+1](#)
- **What it tests**:
 - Basic math and logical reasoning speed and accuracy.[prepinsta+1](#)
 - English comprehension and grammar.[geeksforgeeks+1](#)
 - Coding problem-solving: logic, syntax, and basic data structures.[prepinsta+1](#)

Typical cutoff: Only candidates above a certain percentile move to interviews.[ccbp+1](#)

2. Technical interview

If you clear the NQT, you move to the **technical interview**, usually 20–40 minutes long.[unstop+2](#)

- **Format:**
 - Mostly one-on-one (on-campus or virtual).prepinsta+1
 - Focus on **CS fundamentals** and **projects** you mention in your CV.scribd+2
- **What is tested:**
 - Core subjects:
 - C/C++/Java basics, OOP, data structures (arrays, linked lists, trees, stacks/queues), and sometimes algorithms (sorting, searching).scribd+1
 - DBMS: basic queries, normalization, joins.scribd+1
 - OS basics: processes, threads, scheduling.scribd+1
 - Projects:
 - Explanation of your project, technologies used, and your exact role.unstop+1
 - Coding on-spot: small programs or pseudocode (e.g., palindrome, factorial, pattern).clearround+2

Goal: Check if you can **think like a programmer** and explain technical concepts clearly.clearround+1

3. Managerial / MR (Managerial Round)

This is often shorter (15–30 minutes) and more behavioural.prepinsta+2

- **Format:**
 - Can be combined with HR or separate, depending on the drive.unstop+2
- **What is tested:**
 - **Attitude and fit:** how you handle pressure, teamwork, deadlines.unstop+1
 - **Retention risk:** willingness to work in shifts, travel, different locations, and long-term commitment.clearround+1
 - **Behavioural questions:** conflict in team, a tough project, how you handled a failure, etc.scribd+1

Goal: Ensure you'll **adapt to TCS culture** and stay with the company.clearround+1

4. HR interview

This is usually the last round (10–15 minutes) and more HR-focused.prepinsta+2

- **Format:**

- Friendly but structured; sometimes mixed with MR in one round.prepinsta+2

- **What is tested:**

- Basic questions:
 - Tell me about yourself, family background, strengths/weaknesses.unstop+1
 - Why TCS / IT ? Why this role?scribd+1
- Practical aspects:
 - Acceptable job location, willingness to relocate, bond/shift constraints.clearround+1
- Salary and joining details (for final-level discussions).unstop+1

Goal: Confirm your **motivation, readiness to join**, and basic communication skills.clearround+1

Quick-glance table for 2025–2026 B.Tech freshers

Round	Type	Main focus / skills tested
1	Online (NQT / Foundation + Advanced)	Quant, reasoning, verbal, basic & advanced coding
2	Technical Interview	CS fundamentals, projects, coding on-spot
3	Managerial (MR)	Attitude, teamwork, retention risk, behaviour
4	HR Interview	Communication, motivation, location/shift flexibility

If you tell me your **branch** (CSE, ECE, EEE, etc.) and whether you're targeting **Ninja vs Digital/Prime**, I can tailor a **prep-strategy checklist** round-wise for you.

- 2) What is the technical stack TCS hires for in their 2025-2026 fresher batch?
Languages, frameworks, cloud, databases.

A) For the 2025–2026 fresher batch, TCS does **not restrict you to a single “mandatory” stack**; instead, it hires for a **broad set of technologies** that map to mainstream enterprise-IT, cloud, and digital projects. When you join, you are usually assigned to a **track** (e.g., Ninja, Digital, Prime) and then trained internally in the specific stack your project needs.tcs+2

Below is a **practical, exam-plus-onboarding**-oriented view of what TCS expects and trains freshers on.

Primary programming languages

These are the ones most relevant for **coding tests and fresher onboarding**:

- **Java** – very common for backend, enterprise apps, and many TCS digital projects.indeed+1
- **Python** – heavily used in data-science, AI/ML, automation, and scripting roles; also allowed in coding tests.gec.instacks+1
- **C / C++** – includes object-oriented concepts and data-structures code; often tested in coding rounds.tcsion+1
- **C# / .NET** – used in some enterprise and Windows-based projects, especially in BFSI and government.tcs+1

You do **not** need to master all of these, but being strong in **one language + DSA** is enough for clearing the technical round and getting trained later.tcsion+1

Web / application frameworks

Full-stack and web-app roles often see these in job descriptions or training:

- **Java-based:**
 - Spring / Spring Boot (for backend-oriented fresher roles).indeed+1
 - Hibernate / JPA (ORM used in Java-based enterprise apps).[indeed](#)
- **Frontend:**
 - HTML5, CSS3, JavaScript (vanilla or with basic jQuery) as a baseline.[tcs](#)
 - React / Angular basics increasingly appear in “digital” / Prime-track samples.gec.instacks+1
- **.NET-based:**

- ASP.NET (MVC / Web API) in some domain-specific roles.tcs+1

Fresher interviews typically ask **fundamentals** (OOP, basic REST, client–server) rather than deep framework expertise.tcsion+1

Databases

TCS expects you to know **basic database concepts** and at least one SQL dialect:

- **SQL databases:**
 - Oracle, SQL Server, MySQL, PostgreSQL in enterprise and backend projects.indeed+1
- **Skills tested:**
 - SQL queries (SELECT, JOIN, GROUP BY, subqueries), basic normalization, and constraints.tcsion+1
- **No-SQL exposure** (for higher-end tracks):
 - MongoDB, sometimes other document stores, mainly in cloud-first or digital projects.gec.instacks+1

For fresher interviews, **strong SQL + DBMS basics** is more important than knowing every database.tcs+1

Cloud and DevOps-related skills

In 2025–2026, TCS is pushing cloud and automation, so fresher-track training increasingly includes:

- **Cloud platforms:**
 - **AWS** (EC2, S3, Lambda, RDS, basic IAM) most common, also Azure and GCP in some accounts.gec.instacks+1
- **DevOps-adjacent:**
 - Git / GitHub / GitLab for version control.[tcs](#)
 - Basic CI/CD concepts (Jenkins, pipelines) in digital/Prime tracks.[gec.instacks](#)
 - Docker basics and sometimes Kubernetes in advanced or cloud-focused teams.[gec.instacks](#)

Fresher interviews still **focus on fundamentals**, but having a basic cloud project (e.g., “hosted a web app on AWS/Azure”) can help you get into **Digital/Prime**.[gec.instacks](#)

Data / AI-related (for Digital / Prime)

For **Digital** and **Prime** fresher tracks, TCS is hiring grads with exposure to:

- **Python + libraries:**
 - NumPy, pandas, scikit-learn, basic ML workflows. [indeed+1](#)
- **Data / analytics:**
 - SQL + Power BI / Tableau / basic Python visualization (Matplotlib/Seaborn). [gec.instacks](#)
- **AI/ML basics:**
 - Supervised/unsupervised learning, basic NLP or computer-vision concepts at the **conceptual** level. [gec.instacks](#)

You do **not** need to be a data-science expert; basic projects and understanding are enough for fresher-level roles. [gec.instacks](#)

Quick-reference table (fresher-relevant 2025–2026)

Area	Key technologies / focus
Area	Key technologies / focus
Languages	Java, Python, C / C++, C#
Frameworks	Spring Boot, Hibernate; basic React/Angular; .NET (ASP.NET)
Databases	SQL (Oracle / SQL Server / MySQL), basic MongoDB
Cloud	AWS (core services), some Azure/GCP exposure
DevOps	Git, basic CI/CD, Docker
Data / AI	Python + pandas/scikit-learn, Power BI/Tableau basics

If you tell your **branch** (CSE, ECE, etc.) and whether you're aiming for **Ninja, Digital, or Prime**, I can list a **minimal, focused stack** (which language + 1-2 frameworks + 1 DB + 1 cloud item) you should prepare to maximize your chances.

- 3) What recent news (2025-2026) is relevant for B.Tech students preparing to interview at TCS? Hiring numbers, pivots, layoffs.

- A) For B.Tech students prepping for TCS in 2025–2026, the key news trends are:
high-volume fresher hiring alongside a workforce-reduction and tech-pivoting push. This affects **how competitive it is to get in**, but not your core interview-prep focus. [gec.instacks+3](#)
-
- B) _____
- C) **1. Hiring numbers (2025–2026)**
- D) TCS has publicly projected to hire **around 40,000 freshers in FY25** (ending March 2025), with **similar or higher numbers expected in FY26**, including the 2026 graduating batch. [timesnownews+2](#)
- E) Some sources estimate **about 42,000 freshers targeted for FY26**, continuing the pattern of **large-scale campus/NQT-based hiring**. [tcs+1](#)
- F) **What this means for you:**
- G) Competition per seat is still high, so **NQT score + strong fundamentals** matter more than ever. [gec.instacks+1](#)
- H) TCS is actively running **All-India NQT-based fresher drives for 2024, 2025, and 2026 batches**, so multiple entry windows exist. [tcs](#)
-
- I) _____
- J) **2. Workforce cuts and restructuring (2025–2026)**
- K) In 2025–2026, TCS undertook a **major restructuring**, letting go of roughly **30,000 employees over six months** (Q2–Q3 FY26), mainly due to project rationalization and automation. [indiatoday+1](#)
- L) Reports in early 2026 indicate that **exits and layoffs may continue “as needed”**, though the company stresses it is **not a fixed-target exercise** and focuses on underperformers and low-utilization roles. [peplematters+2](#)
- M) **What this means for freshers:**
- N) TCS is **sharpening performance expectations**; on the job, **productivity, learning speed, and upskilling in AI/cloud** will matter more. [indiatoday+1](#)
- O) For you as a **pre-joining student**, this mainly signals that:
- P) **Strong fundamentals** (coding, DBMS, testing logic) will give you an edge.
- Q) **AI-adjacent skills** (Python, basic ML, cloud-awareness) can help you steer towards “Digital/Prime”-type tracks that are less vulnerable. [timesnownews+1](#)
-
- R) _____
- S) **3. Strategic pivots and tech focus**
- T) TCS is publicly emphasizing **AI, Generative AI, cloud, and automation** in its hiring and training plans for freshers. [gec.instacks+2](#)
- U) Freshers are being onboarded with **training in cutting-edge tech stacks** (e.g., AI/GenAI, cloud platforms, data tools) and placed in **Ninja, Digital, and Prime roles** based on performance and NQT scores. [instagram+2](#)
- V) **What this means for your prep:**
- W) **Core CS fundamentals** (DSA, OOP, DBMS, OS basics) remain the base for clearing interviews. [tcs+1](#)

- X) **Bonus edges** for you:
- Y) Basic **Python + SQL** projects.
- Z) One small project involving **cloud (AWS/Azure)**, **data**, or **web-app** (even if basic).timesnownews+1

AA)

BB) 4. Takeaways for B.Tech 2025/2026 students

CC) Aspect	DD)	2025–2026 reality	EE) How you should respond
GG)	Aspect	HH) 2025–2026 reality	II) How you should respond
JJ) Hiring volume		KK) ~40,000–42,000 freshers per year; campus/NQT process alive. gec.instacks+2	LL) Focus on scoring well in NQT and doing 1–2 solid projects .
MM) Layoffs		NN) ~30,000 exits in 6 months; restructuring ongoing. indiatoday+2	OO) Aim for Digital/Prime-track readiness (AI-awareness, cloud, Python).
PP) Tech pivot		QQ) Strong push into AI, GenAI, cloud, automation. gec.instacks+1	RR) Learn Python + SQL + basic cloud and one framework (e.g., Spring Boot or React) to stand out.

SS) If you share your **branch (CSE/ECE/EEE, etc.)** and whether you're targeting **Ninja vs Digital/Prime**, I can give you a concrete **2025–2026-style 3-month prep roadmap** that fits these current TCS trends.

4) What are the eligibility criteria at TCS for B.Tech 2026 placement — CGPA cutoff, branches, backlogs policy, package range?

A) For B.Tech 2026 students, TCS eligibility, branches, backlog rules, and packages are broadly similar across 2025–2026, but **campus drives can tighten the cutoffs**.prepinsta+3

1. Basic eligibility and academic criteria

- **Degrees:**
 - B.E. / B.Tech (all branches) are eligible for TCS NQT-based fresher hiring in 2025–2026.scribd+2
- **Minimum academics (standard pattern):**

- **60% or 6.0 CGPA in Class 10, Class 12, and B.Tech** (throughout academics) is the usual baseline.adgips.ac+2
 - Some premium-campus drives (e.g., top-tier institutes) raise this to **80% in 10th/12th and 8.0 CGPA in B.Tech**.scribd
 - **Full-time requirement:**
 - Only **full-time** regular B.Tech programs are considered; part-time / correspondence are not eligible.scribd+1
-

2. Branches accepted

For B.Tech 2026, TCS typically considers **all engineering branches**, but campus drives often list specific ones:

- Core branches commonly targeted:
 - **CSE, IT, ECE, Electrical, AI & ML, AI & Data Science, MCA-linked B.Tech streams**.scribd+2
 - **All-India NQT-based hiring** is open to **all engineering branches**, though project allocation later depends on your performance and track (Ninja / Digital / Prime).tcs+1
-

3. Backlogs and gap policy

- **Backlogs:**
 - Usually, **0–1 active backlog** is allowed at the time of appearing for the test / interview.prepinsta+2
 - If selected, **all backlogs must be cleared within the stipulated course duration; no backlogs are allowed at the time of joining**.scribd+1
 - **Education gap:**
 - **Total academic gap should not exceed 24 months (2 years)**, with valid reasons (health, family, etc.).scribd+1
 - Gaps due to **extended education (beyond university-stipulated time)** are generally not accepted.scribd+1
-

4. Age and other constraints

- **Age:**

- Minimum **18 years**, maximum **28 years** is commonly mentioned for 2026-batch fresher hiring.scribd+1
- **Prior work experience:**
 - Some institutes allow up to **2 years of prior work experience** for PG students, but **fresher B.Tech roles are usually for pre-experience candidates**.foundit+1

5. Package range (2025–2026, typical)

The package depends on **track (Ninja / Digital / Prime)** and sometimes institute tier.adgips.ac+2

Track / cadre	Typical UG (B.Tech) CTC (approx.)	Notes
Prime	₹9.0–₹9.3 LPA	Usually for top-performing NQT-scored candidates; higher-skill focus. adgips.ac+1
Digital	₹7.0–₹7.3 LPA	More tech-intensive, AI/cloud-oriented projects. adgips.ac+1
Ninja (standard)	Roughly ₹4.5–₹5.5 LPA (varies by campus)	Mass-hiring, broader job roles across domains. prepinsta+1

Some drives (e.g., MIT Pune-style campus) quote **₹9.08 LPA for UG** and **₹11.58 LPA for PG** for Prime-track roles, reflecting the upper band for strong-college batches.scribd

Quick-check eligibility for you (B.Tech 2026)

To be broadly eligible for TCS 2025–2026:

- **Scores:** ≥60% (or 6.0 CGPA) in **10th, 12th, and B.Tech**.
- **Backlogs:** ≤1 active backlog during the test; **zero at joining**.
- **Branch:** Any B.Tech; CSE/ECE/IT/Electrical/AI-related get more targeted drives.
- **Gap:** Total academic break ≤24 months with valid proof.

If you share your **branch, current CGPA, and backlog status**, I can tell you clearly whether you are in the **safe / borderline / at-risk** zone for TCS 2026 and how to plug gaps fast.

- 5) What are 5 specific preparation tips for a B.Tech 3rd-year student targeting TCS placement? Concrete and actionable.

A) Here are **5 concrete, actionable tips** for a B.Tech 3rd-year student specifically targeting TCS placement in 2025–2026:

1. Lock down 1 hour of daily aptitude practice (NQT pattern)

- Spend **1–1.5 hours every day** on **quantitative aptitude, logical reasoning, and verbal** that match the **TCS NQT 2026 syllabus** (percentages, time-speed-distance, averages, series, puzzles, RC, error spotting, etc.).[scribd+2](#)
 - Use a **structured 8-week plan** from a TCS-NQT-focused guide or sheet and solve at least **10–15 questions per topic** from previous-year placement papers.[geeksforgeeks+2](#)
-

2. Build 1 strong coding project + solve 1 TCS-style coding problem daily

- Pick **one language** (C++/Java/Python) and build **one project** that uses **DSA + basic OOP** (e.g., library-management-like app, simple mini-web-app, or data-processing script).[geeksforgeeks+1](#)
 - Daily, solve **1 coding problem** similar to TCS NQT (arrays, strings, loops, recursion, sorting, searching) from platforms like GeeksforGeeks' TCS-specific question bank.[geeksforgeeks+1](#)
-

3. Master CS fundamentals (DBMS + OS + DSA) in 2–3 subjects per month

- In 3rd year, cover **DBMS (SQL, normalization, joins)**, **OS (processes, threads, scheduling)**, and **DSA (arrays, linked lists, trees, stacks/queues)** in that order, using **standard notes + 10–15 questions per topic**.[prepinsta+1](#)
 - Aim to **write 2–3-line answers** for short-answer-style questions (e.g., “Difference between process and thread”, “Explain 3rd normal form”) so you can quickly explain them in interviews.[prepinsta+1](#)
-

4. Fix CGPA and backlogs early (by 3rd-year end)

- Identify **low-weight / backlog-risk subjects** and plan a **subject-wise improvement roadmap** (high-weight subjects first, targeted practice, doubt-solving before exams).[cgpa2percent+1](#)

- Aim for **≥60% / 6.0 CGPA** in all semesters; if you're below, use **summer/semester breaks** to revise weak subjects and avoid new backlogs so you clear every backlog by final-year exams.[cgpa-calculator+1](#)
-

5. Do 1 mock-interview per month and 1 full-length NQT mock

- Every month, get **1 mock-technical interview** (campus TnP cell, seniors, or online) where you:
 - Explain your project,
 - Solve 1 basic coding problem,
 - Answer 5–6 DBMS/OS questions.[geeksforgeeks+1](#)
- Every quarter, take **1 full-length TCS-style NQT mock (online)** under timed conditions to practice **time-management, shortcuts, and stress-handling**.[gita.edu+2](#)

If you tell me your **branch, current CGPA, and whether you're strong in coding or aptitude**, I can map these 5 tips into a **month-wise 3rd-year plan** tailored for TCS 2026.
